Brightwater Senior Living streamlines operations with the **Yardi Senior Living Suite**

Saved time

HOURS GAINED

BACK ACROSS TEAMS

Automated processes

75% REDUCTION

IN MANUAL REPORTING

Integrated workflows

TOOLS UNITED

ON A SINGLE PLATFORM

THE CHALLENGE

Brightwater used to rely on disparate technology solutions and manual processes. Not only did this approach require teams to navigate multiple systems and platforms, but it was also time consuming, costly and prone to errors.

THE SOLUTION

Brightwater chose the Yardi Senior Living Suite since it seamlessly connects every tool they need on a single platform. Teams now work smarter, faster and more efficiently with an intuitive, integrated solution hosted on the cloud.

Real senior living operator, real results

Thanks to the Yardi Senior Living Suite, Brightwater is boosting efficiency across their communities

HOURS GAINED BACK ACROSS TEAMS

Now that Brightwater is no longer navigating disparate systems and manually transferring data, teams are experiencing significant time savings. Solutions including Voyager Senior Housing, Senior IQ, Yardi EHR and RentCafe Senior CRM offer secure integrations and real-time information sharing — helping leaders and staff complete tasks faster than ever.

75% REDUCTION IN MANUAL REPORTING

With Yardi automating processes Brightwater previously did manually, operations are smoother, teams are empowered and errors are mitigated. With Senior IQ in particular, teams have access to readily updated data and reports via attractive, sharable dashboards — meaning a majority of Brightwater’s manual reporting efforts are no longer necessary.

“Yardi became that full end-to-end solution that has the capabilities and background of years of experience in property management and growth.”
