E&S Ring **enhanced efficiency & productivity** by switching to the Yardi multifamily suite

Reduced expenses	One powerful interface	Enhanced data accuracy
8%	**10+**	**1**
TECHNOLOGY COST SAVINGS	THIRD-PARTY SYSTEMS MERGED	SOURCE OF TRUTH FOR ALL DATA

THE CHALLENGE

For years, E&S Ring integrated numerous third-party systems with Yardi. While this provided specialized tools, it created major challenges for staff training, workflow efficiency and data consistency. Employees often found it confusing to navigate multiple platforms, leading to inefficiencies, data discrepancies and unnecessary operational costs.

THE SOLUTION

Due to their satisfaction with the Yardi platform and after thorough evaluation of competitors, E&S Ring eventually made the full transition to the entire Yardi suite. This shift streamlined operations by consolidating critical functions like CRM, vendor management, invoice and payment processing.

Real client, real results

Within the first 10 months of implementation, E&S Ring **improved processes**, **simplified workflows** and **accelerated onboarding times**, which resulted in cost savings.

MANAGEMENT CORPORATION

Simplified operations

By transitioning to the Yardi multifamily suite, E&S Ring simplified its operations significantly. Before the switch, their team was juggling over 10 third-party systems, causing confusion and inefficiencies. Now that they've centralized with Yardi, their employees have more streamlined workflows with a single point of entry.

Enhanced data accuracy

Centralizing data within the Yardi suite dramatically improved data accuracy for E&S Ring. Previously, they relied on various systems, which led to data inconsistencies and integration challenges. But with all information now housed in one system, E&S Ring's team can trust their data better, leading to faster, more confident decisions.

"Our staff **no longer has to navigate multiple platforms**. Yardi's clean, intuitive interface has made a big difference for our user experience."
