## Rimrock Property Management can think bigger with Breeze Premier

### 2x portfolio growth

Doubled portfolio size with fewer administrators

### Automatic reporting

30-40 minutes of work is now one click of a button

### Full transparency

Owners gain full access to their data from anywhere

### THE CHALLENGE

Onboarding new staff on physical servers was difficult and time-consuming. As a fast-growing small business, Rimrock needed an easy-to-use online platform that would keep them agile while operating at a lower cost.

### THE SOLUTION

By automating routine processes, Rimrock operates more efficiently. They now have an easier time tracking payments, managing communications and screening residents. Breeze Premier's usability and hands-on training brings everything together.

# Real client, real results

Rimrock now provides better service for tenants, faster employee training and smoother operations scaling while reducing costs.

**FASTER  
ONBOARDING**

Breeze Premier's intuitive UX makes it easy to train Rimrock's new team members, many of whom do not have any property management experience.

**ONLINE ACCESS**

With RentCafe, rents get pulled and posted online in real time. Staff can see when rent is in transit, and the AR report shows which payments are outstanding.

**INCREASED  
TRANSPARENCY**

Owners can log in to their portals to view their properties, review AR reports and track work orders at any time. Breeze Premier helps Rimrock concentrate on their buildings instead of micromanaging data.

"Property management software lets even a small business deliver a quality product. Gone are the days of having a building operator run around with paperwork. Accountants benefit from going paperless. CRM reminders also help small companies function like a large organization without increasing costs."
