Better reporting

In one hour, Wolverine builds custom reports that used to take a full week

Increased trust

Investors & owners have 24/7 secure access to their financials online

Full transparency

Important information is sent in real time, available anytime it's needed

THE CHALLENGE

Wolverine needed to give investors and owners better reporting than they could with their previous system. It was of the utmost importance to be able to send real-time information on a moment's notice without sacrificing detail or accuracy.

THE SOLUTION

Yardi Breeze Premier saves Wolverine at least a week's worth of work per month in report generation, averaging out to hundreds of hours a year. They're better able to build trust with investors and owners who need to know their investments are being cared for properly.

Real client, real results

Wolverine works more quickly and confidently, knowing all automated procedures are 100% accurate and fully transparent.

ACCOUNTING MADE EASY

With automated AP and AP, Wolverine can quickly produce reports that are as simple or detailed as necessary. The reports are so intuitive that even investors and owners with less experience or a lower comfort level with financials can quickly understand them.

CUSTOM REPORTING

Wolverine is able to modify and customize owner reports within Breeze Premier. Owners get to see exactly what they want, and they appreciate the team's attention to detail and high level of communication.

“With Breeze Premier, it’s easy to transfer information anytime we need to. It’s important that this doesn’t take up our time because our business has so many moving pieces. Without the automation made possible with Breeze Premier, we wouldn’t have the time or the resources to do a good job for our residents, owners and investors.”
