Property Management

Automate workflows and reduce costs for managing condos, co-ops and homeowner associations with a complete online solution.

Yardi Voyager Condo, Co-Op and HOA

Yardi Voyager Condo, Co-op and HOA is a complete browser-based solution for managing condominiums, co-ops and homeowner associations. This comprehensive system features a single integrated database with tools to track ownership and charges, calculate fees, collect payments, monitor maintenance, enforce bylaws and more. Eliminate manual processing errors and increase efficiencies by automating workflows and offering online services.

Automated Workflows

Voyager includes industry-leading accounting and association management capabilities. Easily calculate percentage-based fees, track changes of ownership and transfer scheduled charges. Automatically calculate one-time charges so you don't have to manually create retroactive fee changes or special assessments.

Online Access

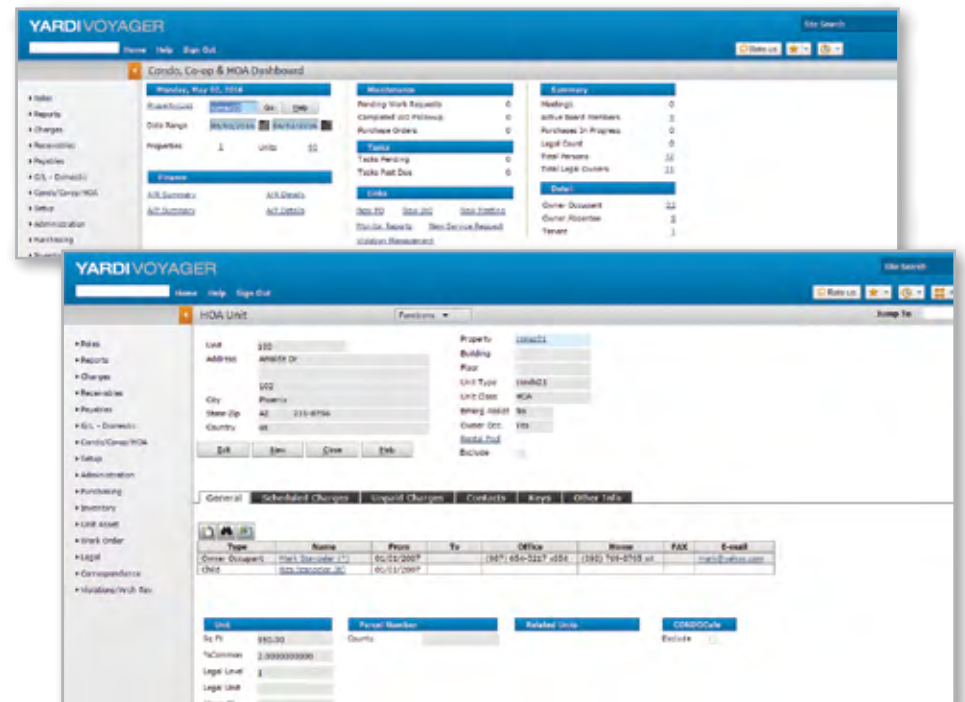

Optimize ease-of-use across your organization with the Voyager online platform. Financial, management and administrative teams can work anytime, anywhere there's an Internet connection with mobile access from smartphones and tablets. Ensure database security with user-based permissions.

Flexible System

Tailor screens, menus and reports to suit your organization and to adapt to regional regulations and changes in accounting principles. Extend the versatility of Voyager by adding CONDOCafé to provide additional online services, including secure owner access to view ledgers, make payments and update contact information.

Integrated Maintenance

Enter, edit and post work orders, add specific instructions for staff and vendors, document the status of any project, create charges and payables directly from the work order record and use work order reports as dispatch tools. Add the Yardi Maintenance Mobile app to enter and manage maintenance activities via smartphones. With Yardi Inspection Mobile your staff can complete inspections for violations and architectural reviews using their mobile devices — and upload the data directly to Voyager.

Customizable dashboards maximize efficiency and transparency by allowing you to see unit-specific tasks, ownership, charges and fees in a single user-friendly interface.

Simplified Rental Pools

Manage rental units for association owners who do not occupy a unit. If an owner asks you to manage a rental or series of rentals, you can add the unit(s) to a rental pool property in the system, add a property owner record, then move a tenant into the unit and collect monthly rent. Rental pool chargeback invoices automate the data entry from a receivable charge on the condo to a payable in the rental pool property. And with the Condo Violations mobile app, you can enter violation data from a smartphone or tablet.

Easy Board Updates

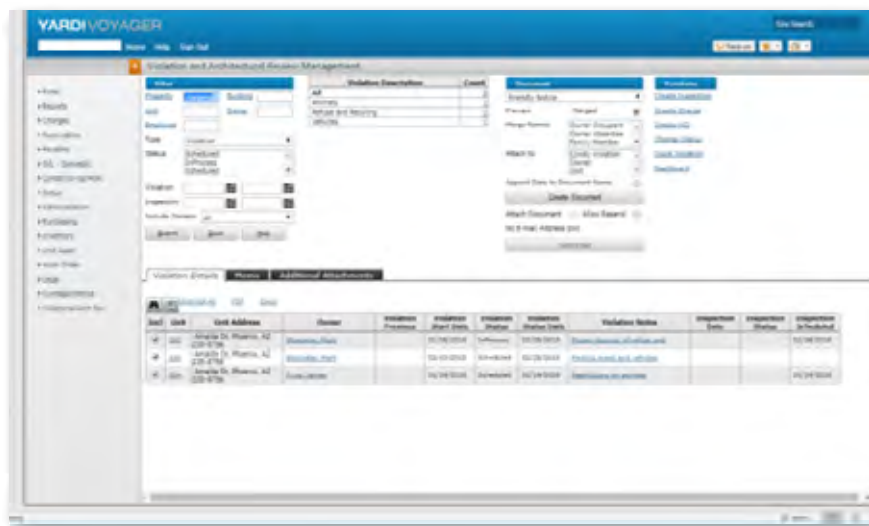

Maintain and update board member lists and create sign-in sheets for board meetings. Scan and attach meeting minutes to the integrated meeting record. Board members have secure, 24/7 access to essential association reports through CONDOCafé.

Built-in Violation Management

The built-in violation management workflow monitors and tracks bylaws per association. In the event a bylaw is violated, you can create custom letters with language from the CC&Rs, manage the distribution of violation letters to owners and charge fines to each owner. The violation management workflow will also allow for tracking architectural review processes within a community. Enter violation data and attach date time stamped photos from the field with the included Violations mobile app.
