

COVID-19 READINESS IN SENIOR LIVING

How Yardi EHR can help you prepare for an outbreak

Caregivers are on the frontlines of COVID-19 in senior living. Take these steps in Yardi EHR to ensure they are well equipped to respond quickly.

01 Roll out temperature reporting.

Track the average daily temperature of all residents with the new temperature log report.

02 Create a symptom assessment.

Build a symptom checker module within Yardi EHR for caregivers to use while charting.

Symptoms may arise 2-14 days after exposure:2

FEVER

COUGH

SHORTNESS OF BREATH

03 Set up alert charting.

Create a specific COVID-19 chart alert so caregivers can flag residents in Yardi EHR if symptoms appear.

04 Establish the incident workflow.

Add steps for critical actions and communications to a custom COVID-19 incident report.

05 Leverage communication tools.

Use built-in features to keep staff up to date on new developments and protocols.

DASHBOARD ANNOUNCEMENTS

Share information on the welcome screen after sign-in.

RESIDENT PROGRESS NOTES

Track the health of residents who've been exposed.

MESSAGE CENTER NOTICES

Trigger notifications based on vital signs or incidents.

Let us lend a hand.

We're here to help. Get assistance setting up Yardi EHR for your COVID-19 response by submitting a case on Client Central or contacting your account manager.

Everyone should conduct their own planning based on their specific location and circumstances. While we are dedicated to providing general information to our clients, it is not intended to be health care or legal advice. Please consult appropriate government agencies and authorities, as well as health care and legal professionals.
