

Yardi Energy

METER INSIGHTS

Improve building energy performance with real-time data insights

Increase visibility and cost control with valuable data directly from your utility meters.

SAVE MONEY

Collect data to analyze and correct utility issues in real time.

SAVE TIME

Get actionable alerts to notify you of concerns as they happen.

ANALYZE DATA

Compare buildings across your portfolio, identify trends and prioritize savings.

FEATURES

METER INSIGHTS

EASY-TO-USE DASHBOARDS

Get insights and analytics with intuitive charts and reports.

PORTFOLIO-LEVEL BENCHMARKING

Use historical weather-normalized models to track and compare building performance and spot outliers.

LOAD PROFILE ANALYSIS

Explore a granular view of data with time overlays, heat maps and more, to spot opportunities for improvement.

RAPID SETUP

Collect data from multiple sources efficiently. Many utilities provide interval data via API without requiring additional hardware.

YARDI VOYAGER INTEGRATION

Leverage property attributes and property lists stored and maintained in Yardi Voyager.

COMPLETE ENERGY SOLUTION

Leverage all products in the Energy Suite to implement a consolidated energy strategy across your portfolio.
