

Yardi EHR

Succeed with an interoperable platform for senior living

Optimize connections, streamline workflows and maximize resident safety with **Yardi EHR**, an interoperable electronic health record solution for senior living. With verified interface partners, Yardi EHR securely collects and transfers resident data around the clock.

80% of survey respondents say the inability to share data between information systems leads to inefficiencies and increased stress levels.¹

DEFINING INTEROPERABILITY

Interoperability allows information systems to seamlessly exchange data with one another. In senior living, interoperable EHRs help operators:

- ✓ Access real-time health information
- ✓ Save time across teams
- ✓ Eliminate data-entry errors
- ✓ Support resident safety
- ✓ Enhance operations and care
- ✓ Connect the entire care team in and out of the community

EHR

An **EHR** (electronic health record) is a digital record of a resident's chart — plus much more — stored in a dynamic online platform. EHRs connect all aspects of care by allowing multiple providers to access real-time resident data, submit updates and communicate from anywhere.

HOW DO EHRs DIFFER FROM EMRs?

EMR

An **EMR** (electronic medical record) is a digital record of a resident's chart, stored in a computer and accessible by a single provider.

71% of survey respondents believe EHRs help them provide high-quality care.²

MEET YARDI EHR

Designed for operators of all types and sizes, **Yardi EHR** combines clinical intake processing, medication management, resident assessments, care planning, wound treatment, behavior management and more in a browser-based, mobile-friendly platform.

INTEROPERABILITY IN ACTION

Yardi EHR channels interoperability through verified interface partners. Not only does data automatically flow to and from Yardi EHR, support teams actively monitor to ensure the highest level of accuracy — equipping you to deliver the best care.

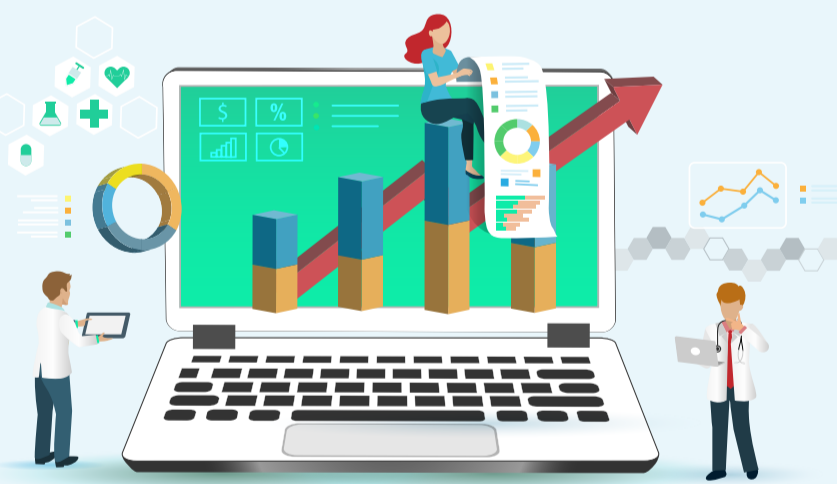

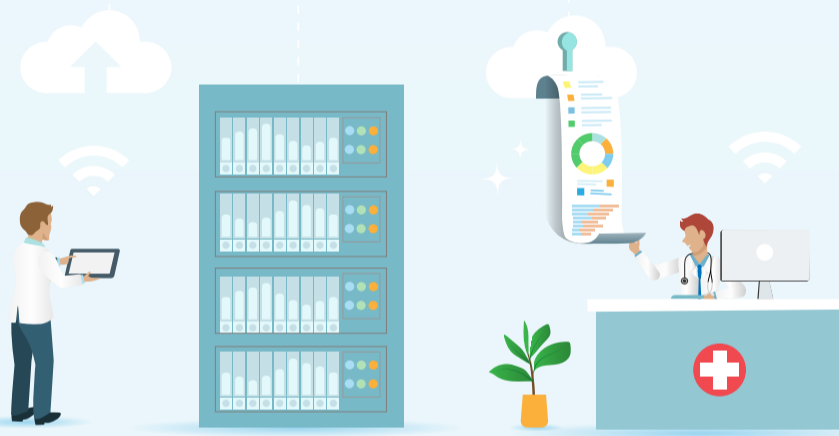

Improved data connectivity between information systems can enhance care outcomes by **94%**.³

Yardi EHR + Kno2

Connect Yardi EHR to all outside providers, HIEs and health systems via Kno2, a health information platform that offers access to cloud faxing, direct secure messaging and referral networks.

- ✓ Meet state health information exchange (HIE) requirements
- ✓ Digitize faxes between communities and providers
- ✓ Reduce risk and rehospitalizations with digital transitions of care
- ✓ Streamline resident clinical move-ins

The use of HIEs and interface connections with EHRs were the most commonly used methods to find health information in 2021.⁴

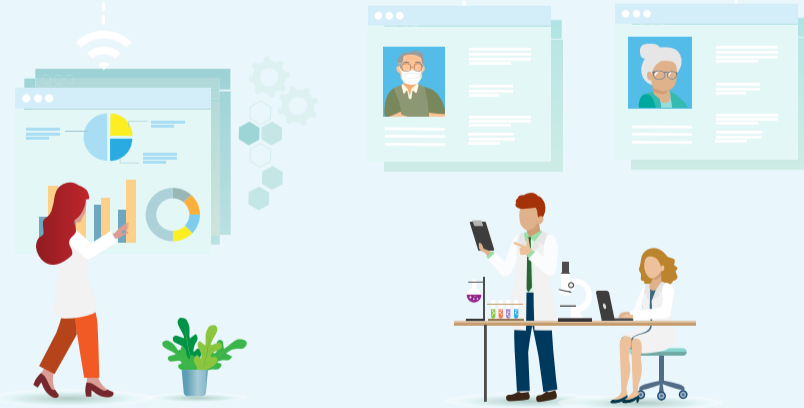

Yardi EHR + DS smart

Instantly transfer EMR data — captured from supported equipment — to Yardi EHR through DS smart, a simplified connectivity solution built to capture, protect and connect resident information.

- ✓ Use Bluetooth-enabled technology to wirelessly transfer data
- ✓ Promote a faster vitals collection process in your communities
- ✓ Reduce transcription errors with an automated workflow
- ✓ Increase staff productivity and efficiency

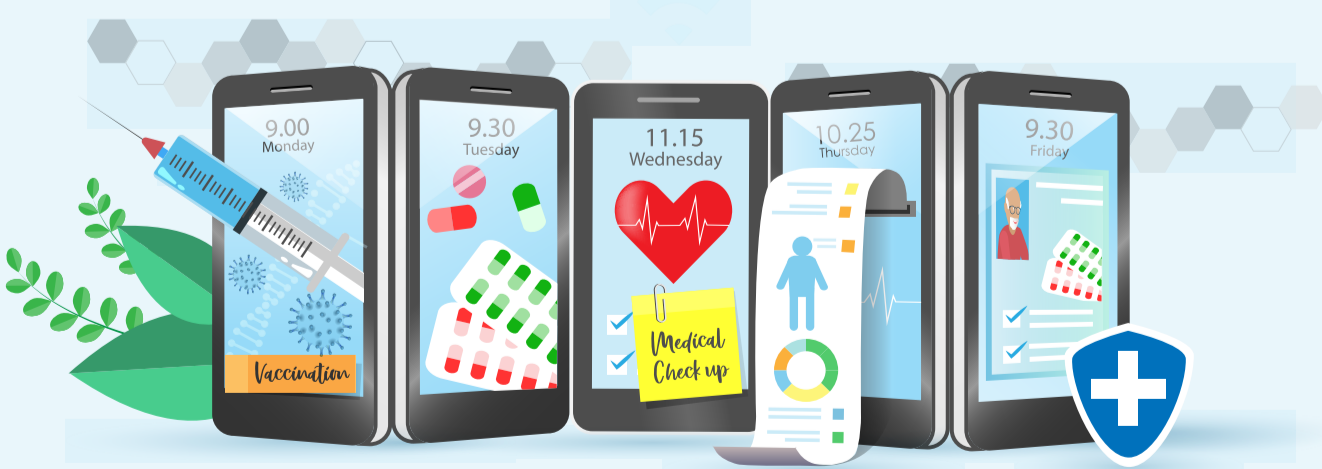

DISCOVER MORE INTERFFACE PARTNERS

Yardi EHR supports a wide variety of additional health interfaces including a nurse call system, dietary management platform, infection control solution and more.

CONNECT WITH PHARMACIES

Add Yardi eMAR to your portfolio and gain access to the Yardi Pharmacy Network, connecting with over **175 interface partners**. Simplify medication management, unlock electronic prescribing workflows and exchange order information with ease.

We're focused on your success.
