

# SUPPORT VALUE-BASED CARE WITH THE YARDI SENIOR LIVING SUITE

Deliver person-centered care and optimize health outcomes for your senior living residents

## SEE THE POWER OF OUR SINGLE CONNECTED SOLUTION

### Why is value-based care important?

---

Value-based care (VBC) focuses on the quality of care and the resident experience. More specifically, enhancing the resident experience through proactive, personalized and person-centered care.

In today's senior living communities, providing VBC can drastically improve resident health outcomes and increase operational returns through better care.

### How does our technology support VBC?

---

The Yardi Senior Living Suite combines resident care, marketing, sales, finance, business intelligence, pharmacy, operations and more on a cloud-hosted, HIPAA and SOX-compliant software platform. The suite of products is single-stack — uniting on a fully integrated platform — and offers intuitive functionality that helps you provide the best care and improve health outcomes across your communities.

## Taking a closer look, our single connected solution supports VBC by:

- ✓ Enhancing communications among residents, families and the entire care team
- ✓ Providing data-driven insights for identifying at-risk residents, proactively mitigating issues and offering preventative care
- ✓ Empowering staff with interoperable workflows, personalized to meet resident needs
- ✓ Supporting community wellness programs and boosting resident engagement
- ✓ Ensuring comprehensive population health management thanks to actionable information and trends
- ✓ Offering a digital signature workflow that enables quick adaptation of care plans as resident needs change
- ✓ Presenting health care data that's pulled into the clinical intake, equipping you to report on resident status during transitions of care
- ✓ Enabling value-based care reimbursement models
- ✓ Centralizing data in one secure place, sharing a cohesive picture of resident health with physicians, health systems and more

# Enable seamless information sharing with Yardi EHR

Yardi EHR is a full-service electronic health record solution that unites clinical intake processing, medication management, resident assessments, care planning and more. It enables streamlined analysis of population health metrics and real-time information sharing — helping you track and improve resident health outcomes.

- ✓ Unlock centralized record keeping, advanced clinical reporting and instant access to health information at the point of care
- ✓ Adapt care plans with maximum efficiency thanks to digital leases and electronic signature functionality, which accelerate care changes based on resident and family preferences
- ✓ Improve care outcomes with unparalleled features and integrations, including secure integration to Yardi eMAR, a comprehensive medication management solution
- ✓ Enable person-centered care through care-preference capture and automatic billing-cost capture

*“With Yardi EHR, our **staff can see tasks remotely on their device** and if anything changes, they can communicate with that device as well. They go from one resident to another without having to change charting.”*

**QUINTIN KING**

President | Brightwater Senior Living

## Explore Yardi interface partners

*Connect Yardi EHR to all outside providers, HIEs and health systems via best-in-class health care APIs and integrated fax.*

- ✓ Meet state health information exchange (HIE) requirements
- ✓ Digitize faxes between communities and providers
- ✓ Reduce risk and rehospitalizations with digital transitions of care
- ✓ Streamline resident clinical move-ins

*Instantly transfer vitals data — captured from supported equipment — to Yardi EHR through **DS smart**.*

- ✓ Use Bluetooth-enabled technology to wirelessly transfer data
- ✓ Promote a faster vitals collection process in your communities
- ✓ Reduce transcription errors with an automated workflow
- ✓ Increase staff productivity and efficiency

Interoperability is built into the core of Yardi EHR, meaning it securely exchanges data with verified interface partners in real time. With access to readily updated health data, you're equipped to coordinate care more effectively — improving resident satisfaction and health outcomes.

### **BENEFIT FROM ADDITIONAL INTERFACE PARTNERS:**

- Accushield for social isolation monitoring
- SafelyYou and others for fall prevention
- eMenuCHOICE and Grove Menus for nutrition management
- Inspiren and others for caregiver engagement

# Analyze clinical trends and population health with Yardi Senior IQ

Senior IQ is a dynamic business intelligence solution that presents real-time, community-specific data in sharable dashboards. You have the power to analyze actionable information and identify trends — helping you predict resident health outcomes and adjust care plans accordingly.

- ✓ Track clinical trends, identify residents at risk, pinpoint problems and improve protocols with resident health data flowing automatically from Yardi EHR
- ✓ View every piece of data in attractive, sharable dashboards built with over 700 pre-configured measures
- ✓ Save hours searching through spreadsheets for information critical to improving resident health outcomes and managing care transitions
- ✓ Mitigate risk and ensure shift assignments meet resident care requirements with a comprehensive staffing analysis tool

*“The value with Yardi Senior IQ is that we can make **real-time changes to either resident care or staffing levels.**”*

**SYNDELL LAWHON**

Vice President of Wellness | Vitality Living

# Boost resident engagement and reduce social isolation with RentCafe Wellness

RentCafe Wellness is a comprehensive community wellness solution that enables you to schedule activities, share information via online calendars, track resident attendance and more. By supporting resident engagement and providing families with access to wellness information, you reduce the risk of isolation — optimizing resident health outcomes.

- ✓ Maximize efficiency with one platform for marketing wellness activities, with the ability to monitor resident attendance and behavior changes
- ✓ Display customized, resident-facing calendars to announce upcoming wellness opportunities, sharable in RentCafe Senior Living Portal
- ✓ Boost productivity among community staff with a single platform for managing calendar content, design, publication, activity registration and attendance
- ✓ Enable residents and families to sign up for activities, manage registrations and submit online payments with ease

*“Residents and their families have given us positive feedback about online payments, the activities calendar and the ability to get community information on their own.”*

**DAN POTEET**

Chief Information Officer | Westminster Village

# Achieve more with our full suite of tools

The Yardi Senior Living Suite has everything you need — all united on a single platform — to support VBC in your communities.
