- The client hardware and software specifications listed in this document are for releases of Yardi-hosted Voyager 6.0 (including the associated Yardi SaaS Select client services) that were available at the time of this publication. As newer system versions are introduced and services upgraded, Yardi reserves the right to update and modify these recommendations.
- Client hardware, memory, and storage requirements can vary greatly, depending on the number of users, network applications, hard disk sizes, remote connection protocol and type, device type, and other issues. Your organization should regularly review company and user hardware and software resources and compare them to current system requirements.
- Clients connect to Voyager 6.0 through the Internet and a remote-desktop connection protocol (for system administration). Good security practices for remote-access communications require the use of standard security hardware and software, such as firewalls and utilities for protection against computer viruses and spyware. Security configuration for hardware and applications is the responsibility of your organization and users.
- For more information about computer and peripheral requirements and resources in your organization, contact your system administrator or computer consultant. For additional information about Yardi SaaS Select client system requirements, contact Yardi technical support.

¹ System requirements presented herein are accurate and reliable to the best of Yardi System's knowledge and belief but are not guaranteed to be so. These requirements are subject to change without notice. Nothing herein is to be construed as recommending any practice or any product in violation of any patent or in violation of any law or regulation. It is the user's responsibility to determine the suitability of any equipment and/or procedure for a specific purpose and to use such equipment and/or procedure as may be necessary and pertinent to the user's organization and business practices.

² Microsoft Windows 8.1 and Internet Explorer 11 are not qualified for use with PAYscan, CHECKscan, and the .NET version of Yardi yCheck. For more information, contact Yardi technical support.

³ For Windows 8.1 and 8 with Internet Explorer 11 or 10, use Desktop browser mode, not Modern/Metro UI browser mode.

⁴ For Microsoft Internet Explorer 11 and 10, Voyager 6.0 requires Compatibility View turned on.

⁵ Although Voyager 6.0 is qualified for Microsoft Internet Explorer 10, Microsoft will end support and no longer provide security updates for Microsoft Internet Explorer 10 beginning January 12th, 2016. For more information, see <https://www.microsoft.com/en-us/WindowsForBusiness/End-of-IE-support>.
