

Yardi Voyager 6.0 System Requirements (Self Hosted)

Recommended and minimum hardware and software specifications¹ for a self-hosted Yardi Voyager 6.0 system.
Yardi Systems, Inc. December 2015.

Voyager Web Server Specifications

Operating system	Microsoft Windows Server 2012, 64-bit ² ; or Microsoft Windows Server 2008 (R1 or R2), 64-bit ² - with latest MS service pack and security updates
Processor	Intel Dual Core, Intel Pentium, AMD, or compatible, 3 GHz or faster, 64-bit (minimum)
RAM	4 GB (recommended); 2 GB (minimum)
Free hard disk space	40 GB (recommended); 20 GB (minimum)
Web server applications, utilities, and components	Microsoft Internet Information Services (IIS), version 8.0 (with Windows Server 2012); or Microsoft Internet Information Services (IIS), version 7.5 (with Windows Server 2008 R2); or Microsoft Internet Information Services (IIS), version 7.0 (with Windows Server 2008 R1) Microsoft .NET Framework 2.0 (Voyager 6.0.08.22-SP18 and later); or Microsoft .NET Framework 1.1 (not compatible with Microsoft Windows Server 2012) - with latest MS service pack and security updates SSL - Secure Sockets Layer security protocol (recommended) Web server security certificate (recommended) Microsoft Internet Explorer 11 ^{3,4,5} ; or Microsoft Internet Explorer 10 ^{4,5,6} ; or Microsoft Internet Explorer 9 - with latest MS service pack and security updates Microsoft Data Access Components (MDAC), version 2.8 Yardi Voyager 6.0 I/P address (static) or domain name for Internet access
Communications protocol	TCP/IP

SQL Server and Oracle Database Server Specifications

Operating system	Microsoft Windows Server 2012, 64-bit ² ; or Microsoft Windows Server 2008 (R1 or R2), 64-bit ² - with latest MS service pack and security updates
Processor	Intel Dual Core, Intel Pentium, AMD, or compatible, 3 GHz or faster, 64-bit (minimum)
RAM	16 GB (recommended); 8 GB (minimum)
Free hard disk space	100 GB (minimum) - RAID 5 or RAID 1+0 configuration
Software applications and components	Microsoft SQL Server database servers: Microsoft SQL Server 2012 Enterprise or Standard Edition (Voyager 6.0.08.22-SP19.1 and later); or Microsoft SQL Server 2008 R2 Enterprise or Standard Edition (Voyager 6.0.08.22-SP16 and later); or Microsoft SQL Server 2008 Enterprise or Standard Edition (Voyager 6.0.08.22-SP16 and later); or Microsoft SQL Server 2005 Enterprise or Standard Edition (when used with Voyager versions prior to 6.0.08.22-SP15, database-compatibility level set to "SQL Server 2000 {80}") - with latest MS service pack and security updates Oracle database servers: Oracle server 9i, 10g; or 11g Yardi Voyager Workstation Administrative Tools 6.0 (optional, when used as database administrative workstation)

Voyager Report Server Specifications

Operating system	Microsoft Windows Server 2012, 64-bit ² ; or Microsoft Windows Server 2008 (R1 or R2), 64-bit ² - with latest MS service pack and security updates
Processor	Intel Dual Core, Intel Pentium, AMD, or compatible, 3 GHz or faster, 64-bit (minimum)
RAM	4 GB (recommended); 2 GB (minimum)
Free hard disk space	80 GB (recommended); 20 GB (minimum)
Software applications and components	Yardi Service Manager for Voyager 6.0.08.22, including Task Runner, Report Runner (requires SMTP-compliant email server) Yardi Conductor (For legacy system installations. Different versions may require either a MAPI-compliant email application on report server, or an SMTP-compliant email server. For more information, contact Yardi technical support.) Microsoft .NET Framework 2.0, with latest MS service pack and security updates Microsoft Office 2010 or 2007 (all 32-bit), with latest MS service pack and security updates PDF Printer Driver software; or PDF995 (purchased version recommended) Yardi Voyager Workstation Administrative (VWA) Tools 6.0 (optional)

Client Workstation Specifications

Operating system	Microsoft Windows 8.1 ³ ; or Microsoft Windows 8; or Microsoft Windows 7; or Microsoft Windows Vista (Business or Ultimate); or Microsoft Windows XP Professional - with latest MS service pack and security updates
Processor	Intel Dual Core, Intel Pentium, AMD, or compatible, 1 GHz or faster (minimum);
RAM	2 GB (recommended), 1 GB (minimum)
Free hard disk space	20 GB (recommended); 10 GB (minimum)
Software applications and components	Microsoft Internet Explorer 11 ^{3,4,5} ; or Microsoft Internet Explorer 10 ^{4,5,6} ; or Microsoft Internet Explorer 9; or Microsoft Internet Explorer 8 - with latest MS service pack and security updates Microsoft Office 365, 2013, 2010, or 2007 - with latest MS service pack and security updates (as applicable) Yardi Voyager Workstation Administrative (VWA) Tools 6.0 (for administrative workstations) Microsoft .NET Framework 2.0, with latest MS service pack and security updates For Oracle databases: Oracle client 9i, 10g, or 11g Microsoft Data Access Components (MDAC), version 2.8 Microsoft Remote Desktop Connection Client (for system administration use; included with Microsoft Windows) Yardi yCheck ³ (if printing checks from workstation) Adobe PDF Reader; with Adobe SVG viewer add-on (for unit brochures)
Printer	Laser or inkjet
Screen resolution	1024 x 768 or higher (recommended), 800 x 600 (minimum)
Internet connection	Broadband (DSL, cable, ISDN) or LAN-based

Security And Backup Component Specifications

Backup servers	Backup Web server and backup database server, with hardware/software components and specifications identical to primary servers
Disk drives	RAID 5 or RAID 1+0 configuration
Software applications backup	For backup Web server: Voyager 6.0, with configuration identical to primary Web server For backup database server: database applications identical to primary database server
Data backup components	Backup disk drive, tape drive, DVD+/-R drive, or CD-RW drive Utilities for database backup, RAID management, and UPS administration
Security components	Firewalls, corporate and personal, as applicable, for servers and all connected client computers, including off-site and remote-client workstations Anti-virus utilities Anti-spyware utilities
Server power backup/filter components	Uninterruptible power supplies (UPS) Power conditioners, including surge suppressors, lightning/voltage-spike arresters, and current limiters (recommended)

- The hardware and software specifications listed in this document are for releases of Yardi Voyager version 6.0 software that were available at the time of this publication. As newer system versions are introduced, Yardi reserves the right to update and modify these recommendations.
- A self-hosted Voyager property-management hardware and software system requires three dedicated servers (for Voyager, the databases, and reports) plus file-storage space on an existing network file server. The Voyager Web server must be dedicated exclusively to the Voyager software system.
- A virtual server can be used for self-hosted Voyager Web and report servers. However, Yardi does not recommend a virtual server for hosting the database server, including the SQL Server database-management system and associated databases.
- Hardware, memory, and storage requirements can vary greatly, depending on the number of users, network applications, hard disk sizes, connection type, and other issues. Your organization should regularly review company hardware and software resources and compare them to current system requirements.
- Yardi recommends the use of backup and security components for hardware, data, and application redundancy. This includes backup servers for your Web and database servers, as required. In case of catastrophic server failure, backup servers allow users to work with minimal interruptions in Web, database, and application services. In addition, you should use backup devices for storing your database backup files. As the Voyager system is an Internet-based application, good security practices also require the use of standard security hardware and software, such as firewalls and utilities for protection against computer viruses and spyware. Security configuration for hardware and applications is the responsibility of your organization and users.
- For computer and peripheral requirements and resources in your organization, contact your system administrator or computer consultant. For additional information about Voyager system requirements, contact Yardi technical support.

¹ System requirements presented herein are accurate and reliable to the best of Yardi System's knowledge and belief but are not guaranteed to be so. These requirements are subject to change without notice. Nothing herein is to be construed as recommending any practice or any product in violation of any patent or in violation of any law or regulation. It is the user's responsibility to determine the suitability of any equipment and/or procedure for a specific purpose and to use such equipment and/or procedure as may be necessary and pertinent to the user's organization and business practices.

² Microsoft Windows Region and Language settings must be configured for "English (United States)."

³ Microsoft Windows 8.1 and Internet Explorer 11 are not qualified for use with PAYscan, CHECKscan, and the .NET version of Yardi yCheck. For more information, contact Yardi technical support.

⁴ For Windows 8.1 and 8 with Internet Explorer 11 or 10, use Desktop browser mode, not Modern/Metro UI browser mode.

⁵ For Microsoft Internet Explorer 11 and 10, Voyager 6.0 requires Compatibility View turned on.

⁶ Although Voyager 6.0 is qualified for Microsoft Internet Explorer 10, Microsoft will end support and no longer provide security updates for Microsoft Internet Explorer 10 beginning January 12th, 2016. For more information, see <https://www.microsoft.com/en-us/WindowsForBusiness/End-of-IE-support>.
