

One Platform, Connected Solutions

Why Choose Yardi Energy Suite?

The **Yardi Energy Suite** empowers building owners and managers to reach their financial and sustainability goals. With seamless access to utility spend, cost recovery and whole-building data, Yardi makes it easy to maximize NOI and simplify reporting.

LEVERAGE CONNECTED SYSTEMS

Choose Yardi as your preferred provider for seamless and efficient utility management. When combined with Voyager, Yardi Energy Suite offers built-in benefits:

Simplified Implementations: Avoid delays, backlogs and ETL lag for the shortest implementation lead time.
Streamlined User Experience: Navigate familiar tools, permissions and processes without logging out of Voyager.
Efficient Data Handling: Leverage Yardi Cloud services and security while gaining visibility for reporting.

EXPLORE COMPREHENSIVE SOLUTIONS

Track utility, sustainability and financial performance in one dashboard

Utility Invoice Processing

- Fully automate invoice tracking, validation and payments
- Minimize late fees, disconnects and errors with paperless billing
- Measure and analyze utility cost, consumption and demand

Utility Billing

- Maximize utility recoveries
- Ensure accuracy and save time with automated validations
- Minimize regulatory risk with program compliance expertise

ESG & Energy Efficiency

- Optimize energy efficiency and building performance
- Simplify ENERGY STAR® Benchmarking and Certification
- Prepare for mandatory disclosures with ease

UNCOVER OPPORTUNITIES WITH YARDI ENERGY SUITE

Yardi Energy Suite has the depth and breadth to support your organization's evolving goals around utility expense management, energy efficiency and performance disclosures.

Reduce Unnecessary Costs

- Avoid late fees, misapplied payments and billing errors with automated invoice processing
- Automatically detect, correct and resolve billing errors and disputes with the utility
- Design, install and maintain submetering systems with dedicated field and regulatory support
- Reduce consumption by optimizing HVAC systems in real time and maintain savings over time
- Identify leaks and abnormal usage, receive timely alerts and empower site managers to act

Monitor Portfolio Trends in Yardi Pulse

- Navigate an intuitive user interface to understand performance, down to the meter level
- Identify savings opportunities with detailed usage insights, heat maps, time overlays and more
- Compare buildings and spot outliers with historical weather-normalized models
- Save time by leveraging property attributes stored and maintained in Yardi Voyager

Navigate the Future of Energy

- Prepare for emerging regulations by measuring energy, water, waste and recycling data
- Eliminate manual data entry while ensuring submissions are accurate and on time
- Integrate data from multiple sources efficiently while ensuring an auditable trail for reporting
- Get full visibility into property details in ENERGY STAR Portfolio Manager®
- Aggregate whole-building data while minimizing the need for estimations

BENCHMARK BUILDINGS AND EARN RECOGNITION

Advance your ESG strategy with solutions for efficient data collection, benchmarking tools, building certifications and climate disclosures.

As a proud ENERGY STAR Partner of the Year with Sustained Excellence and a GRESB Global Partner, Yardi ensures the highest quality data and streamlines reporting with direct data sharing via APIs.
