

YARDI MEDUSA HARDWARE

Transform your Flexible Space with resilient, high-performance Internet and Wi-Fi

Improve connectivity in your workspace by delivering high-speed data and a seamless Wi-Fi experience, as well as feature-rich voice solutions. Customize your technology to fit your workspace.

MAKE MEMBERS HAPPY

Allow your members to connect at any location with fast, dependable Wi-Fi and voice services.

INCREASE SECURITY

Strengthen user security without sacrificing quality service and connection.

GET VALUABLE INSIGHTS

Gain visibility into bandwidth usage through detailed reports and analytics.

FEATURES

YARDI MEDUSA HARDWARE

MULTI-LOCATION ROAMING

When visiting other locations across your coworking operation, members gain instant Wi-Fi guest access without the need to login.

FULL BUILDING MOBILITY & ROAMING

Members can move around, work or relax anywhere in your building and remain fully connected to their own secure company networks through high-performance Wi-Fi.

CATER FOR ALL USERS

Yardi Medusa provides appropriately featured, secure network environments for companies, cowork members and guests. Medusa also supports other network needs such as building access and CCTV.

DESIGNED IN RESILIENCE

Yardi Medusa eliminates critical elements with full failover provision that delivers a non-stop workspace experience for your occupiers.

BANDWIDTH PACKAGES

Create a solution for different usage levels and give members visibility into their bandwidth utilisation.

FULL SERVICE CAPABILITY

Full service solution that includes helping clients design internet and Wi-Fi service packages for members, networking, Wi-Fi, voice, and an onsite hardware service team and expert helpdesk support.

WARRANTED GIGABIT WI-FI

With our survey and design service you can ensure uniform building coverage at blazingly fast gigabit speeds, with load balancing, resilience and interference rejection.

BANDWIDTH MANAGEMENT

Monetize bandwidth for companies and members with our versatile traffic manager, including real time and historical graphing of usage.
